

Name of Project

CSO Website!

Summary

This final project will be the website of my own company that we are opening with my dad. It is a service company based on management coaching on one hand and on the other hand marketing development. We are building this company to help start up and PME to survive from the 1st to 5th years of their company and showing a positive financial statement with a profit or at least break even.

Features

- HomePage with the logo, a video showing the slogan, mission of the company and method. Vidéo in autoplay and in loop. There is as well a contact button. I will probably add as well a direct chat to answer customers questions on the spot. A 3 differents languages available: Fr=French, En=English and Es=spanish
- Services page - will have the description of what the company offer
- Portefolio page (I will try to add some project if I can)
- Review page
- Contact page
